DeepBlue Coin WHITEPAPER

Abstract

DeepBlue Coin is a decentralized digital asset designed to store value, prevent whale manipulation,

and contribute to ocean conservation. Powered by blockchain technology, DBC aims to balance

wealth creation with environmental impact.

Mission & Vision

Mission: To build a community-driven crypto asset that rewards long-term holders while funding

marine sustainability.

Vision: A financially free world rooted in deep value, clean oceans, and fair governance.

Problem

DBC addresses crypto volatility, wealth concentration by whales, and the lack of eco-conscious

tokens. Our innovation is financial and environmental.

Solution

DBC implements whale caps, auto-distributed transaction taxes, and a DAO to create stable,

community-controlled, and eco-impacting currency.

Tokenomics

Supply: 1 Billion DBC

Initial Burn: 10%

Tax: 5% per trade

- 2% Ocean Fund

- 2% Rewards Pool

- 1% Liquidity

Use Cases

DBC is used for staking rewards, NFT payments, ocean donations, and future DeFi integrations.

Governance

A decentralized autonomous organization (DAO) allows token holders to vote on upgrades, charity partnerships, and strategic direction.

Roadmap

Q3 2025: Token + DAO launch

Q4: Listings, staking, donations begin

Q1 2026: NFT app + audit

Q2 2026: Web3 expansion

Security

Smart contracts follow OpenZeppelin standards and will be audited. Funds are secured with multisig wallets.

Conclusion

DeepBlue Coin is a symbol of sustainability, decentralization, and digital innovation. Join us to build wealth with purpose.
